Emergency Exit Sign Light - SL Series 6 (Slim Line)
Model : SLS6-10LED/S (W)

Product Overview

Emergency Exit Sign Light SLS6-10LED/S (W) (Single sided) is designed for wall installation. It uses SMD Low Power High Lumen LED bulbs and employs SMT technology in production. It also includes an Aluminum PCB LED panel, which can help dissipate heat, resulting in electricity savings and a long operational lifespan. The sign's symbol display panels are constructed using layered acrylic sheets. The middle layer utilizes Transparent Acrylic, which serves as a medium for transmitting light generated by LEDs. It also uses milky white acrylic sheets with light-diffusing properties across the entire panel after extended usage, complying with TIS 2430-2552 and TIS 021004-22 standards. The housing is Aluminium Extrusion with epoxy powder coating enameled to help protect from any possible rust.

Technical Specifications

Mode of Operation	Maintained
Operation Temperature	10 to 50°C
Input Voltage	220 - 240 VAC / 50Hz
LED Lamp Power	10W
Color Temperature	6500K - 7000K
Battery Type / Capacity	Lithium Iron Phosphate (LiFePO4) 3.2V-2000mAh
Protection Features	- AC, DC Fuse - Battery Low Voltage Cut-Off - Surge Protection
Testing Systems	- Auto Test - Manual Test or Remote Test
Charging Method	3 Steps Charger System
Charging Period	10-15 Hrs
Backup Time	3.0 Hrs
Housing	Aluminium Extrusion with epoxy powder coating
Dimensions (L x W x H)	345 x 40 x 233 mm
Weight	1.43 Kg
Degree of Protection	IP20
Mounting	Wall (Type W)
Viewing Distance	24 M (Pictogram Height 10 CM)
Accessory	Infrared Remote Test (RT-S3)
Standards / Compliance	- TIS.1955-2551 - ISO9001 - CE

Features

Bulb
- Highly efficient and super bright 10 Watts LEDs provides maximum brightness while saving on power consumption. It also offers long operational life of more than 50,000 hours

Battery
- Use Lithium Iron Phosphate (LiFePO4) 3.2V-2000mAh, backup power for 3 hours. It has the advantages of light weight, long service life and high power. It also causes less pollution

Functions
- Auto Test schedule: 1 month every 60 seconds, 1 year every 120 minutes (according to standard TIS.021004-22), activate and deactivate functions with a remote control
- The operation can be tested manually (Manual Test)
- A 5-second, 30-minute or 60-minute self-test can be performed on the unit using the remote

Circuit Systems
- Controlled by an 8-bit microcontroller circuit

Protection Features
- AC and DC fuse to prevent current overload
- Surge Protection
- IP20 dust and water resistant

Features to Extend Battery Life
- An innovative 3 Steps Charger System
- A Low Voltage Cut-Off to prevent the battery from draining completely

Warning Systems
- An LED will blink 3 times every 15 seconds to indicate that the system performs an automatic battery test (Auto Test) and detects that the backup lighting emergency duration is less than 120 minutes (Battery Fail)
- An LED will blink 4 times every 15 seconds to indicate that there is a problem charging the battery (Charging Fail)
Indicators

Off/Test	AC	Charge/Full
○	● (orange)	● (red)
○	● (green)	● (red)
IR	On/Test	Fail

Switch **Off/Test**	▶	Press to turn off the lamp and the system of the unit (while the power is off or the unit is not plugged in) / Press to test the device's availability (during normal circumstance and the unit is plugged in)
LED **AC**	▶	Indicates that the unit is receiving a power supply
LED **Charge/Full**	▶	Indicates that the unit's battery is charging
IR	▶	Infrared signal receiver
LED **On/Test**	▶	Indicates that the unit is receiving a power / Indicates if the unit is performing a self-test
LED **Fail**	▶	Indicates there is a problem with the battery

Dimensions (mm)

FRONT VIEW — 345, 67, 233, 198, 340, L 345

BACK VIEW SINGLE SIDED — 345, 230, 67, H233, 198, 340, L 345

SIDE VIEW — W 40, 67, H233, 198

TOP VIEW — W 40, L 345

BOTTOM VIEW — W 40, L 345

Installation

Wall (Type W)
(installation with kit included)
