

USER MANUAL

Self-Contained Emergency Light | TM Series

Installation and Operation

1. The unit can be installed on leveled ground or hung up.
2. Install properly and securely to prevent accidents that could cause damage to the unit or other people and property.
3. Plug the unit into a power socket with a 230VAC power supply. The emergency lamp will remain on for about 2 seconds before turning off, Notice the LED will show the status as follows.
 - 3.1 The LED "AC" will turn on indicating that the unit is receiving power.
 - 3.2 LED "On/Timer" lit or flashing slowly indicates the status of the unit ready to use.
 - 3.3 The LED "Charge" will be on when the battery is charging.
 - 3.4 The LED "Charge" will be off when the battery is fully charged.
4. When the unit is operational, tests can be performed.
 - 4.1 Pressing the "Off/Test" switch the emergency lamp will remain on for about 5 seconds before turning off.
 - 4.2 Unplug the unit from the 230VAC socket and the emergency light should turn on automatically and plugging the unit back in should cause the emergency lamp will remain on for about 5 seconds.
5. During power outages the emergency light should automatically turn on and will turn off automatically and start charging the battery once power is restored.

Caution: Please always read the manual prior to installation and operation.

Important Note on Using the Unit

1. The emergency lighting unit should be installed indoors, out of direct sunlight and humidity. It should not be installed in environment with temperatures higher than 40 degrees Celsius.
2. The unit should be stored in temperatures under 25 Degree Celsius and the battery should be charged every 3 months to maintain its operational life.
3. Please always read the manual carefully prior to operating the unit for the safest and most effective use of the product.
